## FOR IMMEDIATE RELEASE

### **VDO360 Launches 1SEE Webcam with Integrated USB Hub**

The 1SEE is a Versatile, Compact 1080p HD Camera with Integrated USB Hub

(EDGEWATER, Md. – August 5, 2020) – VDO360 launches the 1SEE 1080p webcam with integrated USB Hub for premium performance with a compact design– perfect for home use, when you’re back at the office, or work-from-anywhere applications.

The 1SEE webcam, second in the VDO360 Series of SEE cameras, provides enterprise-grade high-definition video packed into a small, aluminum block case.

“This is really the perfect webcam for everyday use,” says Dan Freeman, CEO, and founder of VDO360. “You get excellent performance in a very small package that mounts easily to your monitor or tripod. The sturdy milled aluminum case stands up to anything your bag can throw at it. Toss it in and head to the office, dining room table, or wherever your laptop takes you.”

“The team at Almo ProAV is a proud partner with VDO360 as the exclusive distributor for the “Work-from-Anywhere” collection of SEE webcams,” says Stephen McKay, Sr. Vice President – Hospitality, National Business Team, DMR, Global. “The 1SEE not only has a high-quality camera and tripod mount connection, but also a USB port on the back. Often you can run short of USB ports on your laptop or tablet device and this extra port gives you the ability to plug in an additional device like the portable audio/mic Yamaha YVC-200.”

To learn more about VDO360 or the 1SEE webcam, please contact Kelly Perkins at [kellyp@vdo360.com](mailto:kellyp@vdo360.com) or by phone at 612-298-7688.

### **About VDO360**

VDO360 continues R&D for the next generation of collaboration systems in consideration of not only the technology, but how people are using it. Change is inevitable, and technology changes faster than people do. Our goal is to bridge the divide between how people use visual collaboration and the latest technologies available now and in the future. Innovation is key, from our entry into the market with the first affordable PTZ USB camera, to our latest

autonomous camera systems, we at VDO360 have consistently led the way in visual collaboration. The video experience provided by VDO360 products is unrivaled in quality. While many may think that “good enough” is fine, we feel this is why many users are unfulfilled when it comes to the other video collaboration peripherals available in the market today. Our cameras are designed to not only provide amazing video, but to be comfortable and easy to use.
